

SERPA

4000ATP Automatic Tray Packer

Ideal for loose or pre-packed groups of bottles, cans and jars, this ergonomically designed tray packer tightly forms a tray around product to create stable packs with minimum material. It meets all sanitary and food industry requirements with stainless steel, fall-through construction.

Quick-change Product Separators

Quick-change feature allows for quick changeover without removing chains.

Quick Changeover

Quick and accurate changeover takes as little as 20 to 30 minutes with locally hung tools.

Oscillating Product Laner

Two-axis oscillating product laner conditions bulk product infed into lanes.

4000ATP Automatic Tray Packer

A little about Serpa Packaging:

Each 4000ATP is customized to your specific needs. We work hard to ensure that you get the best design possible for your tray packing needs. In order to achieve this, we must have a lot of innovative capability. That's why our largest investment at Serpa Packaging Solutions is in engineering. Our engineers test, debug, and prove every design. After your 4000ATP is installed, they monitor your satisfaction by providing you with maintenance and technical support.
